Construction drawings are meant to be, in many ways, design intent drawings. Architects rely upon submittals, or shop drawings, to help us understand how things will physically be built. We don't (often) show every nail or connection on our drawings, we rely upon the people building to convey that information.

Top 10 Problems That Come Up During Construction - Board ...

PBES are bridge components which are either built near the bridge site or offsite. These components are transported to the building site, away from bridge traffic, and can be installed very quickly. This is a huge change from traditional methods using concrete, which must be reinforced, poured and allowed time to cure.
