**Marine Engine Fuel**

The Cat 3408 is a diesel internal combustion engine. A report on the Georgia State University website notes that, unlike an Otto cycle engine, which uses a spark plug to ignite gasoline fuel, a diesel engine uses compression to generate intense heat that causes the combustion of diesel fuel.

The CAT 3408 is a diesel internal combustion engine that can provide quite a bit of power. This 8-cylinder engine can achieve anywhere from 440 to 520 horsepower and generate up to 266 kW of electrical power. For truckers, this power may not have been enough to offset the added weight of the engine, but for many other applications, this
