Dentistry in rabbits and rodents - ResearchGate

Rabbits and rodents are very sensitive anaesthetic patients. Therefore a very thorough pre-, intra- and postoperative care is essential. In addition to that, rabbits should be intubated, if possible, as many of them suffer from chronic respiratory diseases, and it also offers better possibilities for interventions in the case of an emergency (e.g. sudden respiratory arrest).

Anesthesia and Analgesia - Dentistry in Rabbits and ...

Recently, the subject of rabbit and rodent dentistry has received considerable attention. In the past, dental disease of rabbits was described simply as "slobbers," "lumps," or simply "malocclusion" with little thought to underlying etiology.
