Engineering Magnet ohydrodynamics

Magnetohydrodynamic
s (MHD ; also magneto-
fluid dynamics or
hydromagnetics) is the
study of the magnetic
properties and
behaviour of
electrically conducting
fluids. Examples of
such magnetofluids
include plasmas, liquid
metals, salt water, and
electrolytes.

Magnetohydrodyna

mics - Wikipedia

Magnetohydrodynamic
s (m.h.d.) concerns the
interaction between a
conducting fluid in
motion and a magnetic
field. If a fast-moving
gas at high
temperature (and
therefore ionised)
passes across a
magnetic field, an
electric field is
developed across the
gaseous stream
exactly as if it were a
metallic conductor, in

Magnetohydrodynamic
s (MHD) is a
combination of fluid
mechanics and
electromagnetics
concerned with the
motion of electrically-
conducting liquids and
gases in the presence
of a magnetic field.

Examples of technical
