Light the Future OSRAM Opto Semiconductors stands for innovative, trend-setting technologies for illumination, visualization and sensing. Future technologies are the wheels on which we move our lives forward. Our dreams and desires are the engines that turn the wheels and set the pace of change.

Light the Future | OSRAM

The future, say OSRAM, is photonics. Which to you and I means the "entire technological range of visible and invisible light." Think fibre-optics, infrared, facial recognition, iris scanners, traffic systems, CCTV, hazard awareness, autonomous driving, AR, VR, water purification, urban horticulture, ... and a whole lot more.

OSRAM - Redefining Light for the Future : Creative Supply

Measurements in the light laboratory show just that. However, halogen headlights only maintain their level if the lamps are state of the art and meet the regulations. An old rule of headlight developers goes: the lamp is just as important as the headlight itself. Brand products such as the ones from Osram take this into account.
