Developed by Apple and nearly identical to the MP4 format, a file with the M4V file extension is an MPEG-4 Video file, or sometimes called an iTunes Video file. You'll most often find these types of files used for movies, TV shows, and music videos downloaded through the iTunes Store.

## **M4V File (What It Is and How to Open One)**

The M4V file format was developed by Apple from the MP4 format. M4V is used to store movies, TV series, and music videos in the iTunes Store. Note that M4V files from the iTunes Store may be copy protected. Unprotected M4V files will play on a Windows computer if you have QuickTime installed, but many mobile devices don't fully support M4V.
