First, and most importantly, is there a way to retrieve x_2 from the lm -object in its original form. Or more generally, if some function f has been applied to some variable in the lm -formula, can the underlying variables be extracted from the lm -object...

Way to extract data from lm-object before function is applied?

`read.maimages` optionally constructs quality weights for each spot using quality functions listed in `QualityWeights`. If the data is two-color, then `read.maimages` produces an `RGList` object.

Package 'limma' - Bioconductor

If there are 168 points, just set it to `xlim=c(0,168)`, suppress the axis and label it separately, e.g. The x-axis might be a bit full that way, so maybe you want only to annotate every 6th hours or so. And then you recode the data in a way that the timepoints match, something like "hours since beginning" or so.

M = dlmread ('filename', delimiter, range) reads the range specified by range = [R1 C1 R2 C2] where (R1,C1) is the upper left corner of the data to be read and (R2,C2) is the lower right corner. You can also specify the range using spreadsheet notation, as in range = 'A1..B7'.

dlmread (MATLAB Functions)

Noninteger dimension bound expressions are converted to integers before use. Any fractional part is truncated. Adjustable Array. If the dimension declarator is an arithmetic expression that contains formal arguments or variables defined in the COMMON statement, then the array is called an adjustable array. In such cases, the dimension is equal to the initial value of the argument upon entry into the subprogram.

read.ilmn.targets reads in Illumina expression data using the file information extracted from a target data frame which is often created by the readTargets function. neqc performs normexp by control background correction, log transformation and quantile between-array normalization for Illumina expression data.

R: Read Illumina Expression Data

I'd like to ask some more about this. But it might be that my 'lingo' isn't what it should be, my first language isn't English. But here I go: I also have these read-only dimensions. I wanted to make a new configuration of a door I made. We here use single doors and double doors.

Read only dimensions | SOLIDWORKS Forums

: dlmwrite (file, M, "-append", ...) : dlmwrite (fid, ...) Write the numeric matrix M to the text file file using a delimiter. file should be a filename or a writable file ID given by fopen. The parameter delim specifies the delimiter to use to separate values on a row.

Function Reference: dlmwrite - SourceForge

Glulam is usually known as the new steel, mostly because of its moldability and high strength properties. Aside from the fact that glulam creates opportunities for architects, contractors and hobby carpenters to create small and large constructions, it is also a sustainable choice for the future.

Advantages of Glulam - Setra Group

Charge in Magnetic Field Consider the motion of a charge in combined electric and magnetic fields. The equation of motion is $m \frac{d\vec{v}}{dt} = q\vec{E} + q \vec{c} \times \vec{v} \times \vec{B}; \sim (1)$ where in Gaussian units, we have
